

Mobile PBX

info@faranani.net +27 11 206 2900

Why MPBX...

- Mobile PBX (MPBX) is designed to provide Corporate and SMEs with business grade telephony features, on a true Fixed Mobile Converged solution.
- Use traditional PBX features, like Auto Attendant, Hunt Groups, Receptionist, etc., on a mobile phone.
- Business can port their geographic fixed line telephone numbers and use it with MPBX.
 - No need to get new numbers, or change your marketing or business cards to reflect new phone numbers.
- Lower operational cost than a traditional PBX.
 - Save on call costs by making calls at fixed line call rates, even from linked mobile phones.
 - No incoming call forwarding charges to transfer business calls to mobile phones.
 - Mobile PBX does not need traditional Telco or internet lines, therefore no line rental charges.
 - No need to upgrade your data network and cabling to support IP telephones, as the solution can work purely on our network using mobile phones.
 - Go Green, and reduce your electricity bill. There is no need for desk phones or LAN equipment, so no power is consumed for telephony.
 - Manage staff call costs by having detailed call records and charges with optional TMS, plus control what numbers staff can dial.
 - No more claims or allowances to process for staff claiming business calls charges made from their personal mobile phones.
 - Staff are more productive as they can always receive calls, even when they are not at their desk.
- Access links for (VoIP) or desk phones can be supported, if required.

Mobility Advantage

- Split bill for business and private calls.
 - Business calls are automatically charged to the companies' account.
 - Business calls does not consume minutes or generate call charges on the linked mobile handsets.
 - Business and private mobile contract users receive separate bills.
 - Corporates pay a standard rate for business calls, instead of paying different call rates.
- Business can advertise a single contact number.
 - The business landline numbers will be displayed to the called party when staff make business calls from their mobile phone.
 - Keep the same fixed line number, even when the mobile number linked to this service is changed.
- Easy to use.
 - Works with most mobile phones.
 - Some basic GSM phones can be used-whitelisted smart phone application on the phone to make business calls.
 - MPBX calls do not consume data for voice calling. Calls are made using normal GSM calls.
 - Users can control their MPBX features via phone app or by dialling feature codes from their mobile phone. (Example, Activate do not Disturb, Activate/Deactivate call forward, Call Pickup, etc.)

- **Manage** when you want to receive business calls.
- **Online portal** to manage personal MPBX features and functions.

How does Mobile PBX work?

Receiving a business call

info@faranani.net +27 11 206 2900

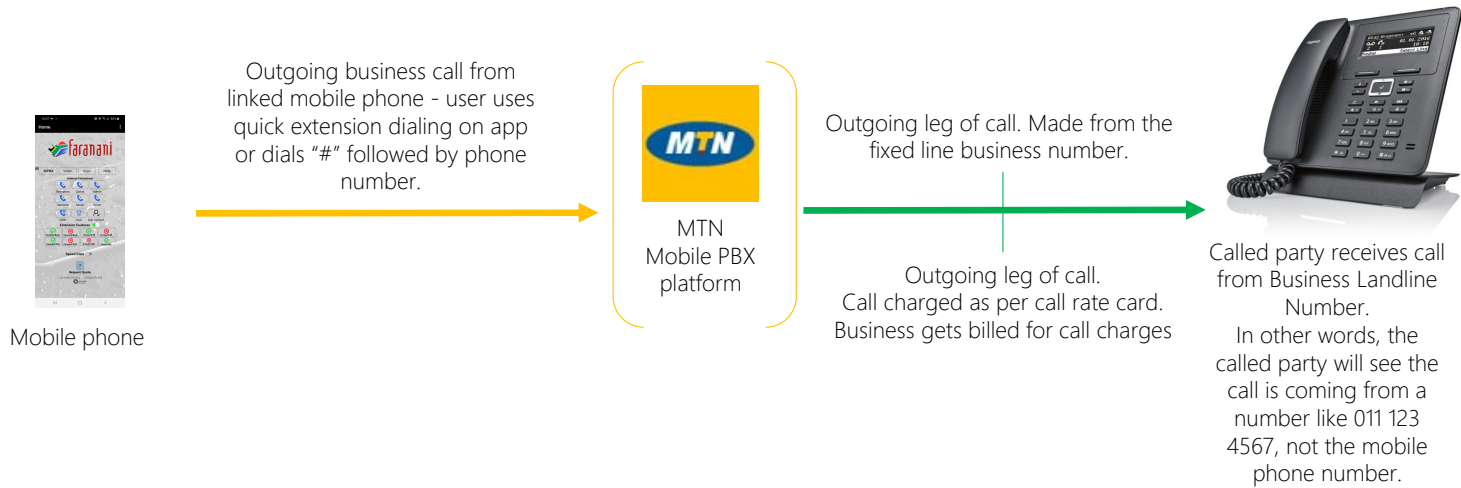

How does Mobile PBX work?

Outgoing business call from Mobile

Outgoing business call from linked mobile phone - User dials "#" followed by phone number. Calls are charged at the normal MTN fixed line call rates, plus an additional R0.20 per minute. Call charges for this call will be charged to the business account and not the mobile account.
